Software Engineer | Full Stack Developer | SaaS & AI Enthusiast

CAREER OBJECTIVE

- To work as a Software Engineer where I can apply strong fundamentals in programming, problem-solving, and web application development to build scalable and reliable products. I aim to grow as a product-focused developer by learning deeply, taking ownership of systems, and contributing to long-term product innovation.

PROFESSIONAL EXPERIENCE

- **Software Developer** Jun 2025 – Feb 2026
Leada Digital Dynamics 8 Months
 - Worked as a full stack developer contributing to the design and development of SaaS-based web applications.
 - Developed and maintained CRM modules including lead management, contact handling, and activity tracking.
 - Built RESTful APIs using Node.js and Express.js and integrated them with React-based frontends.
 - Implemented role-based access control (RBAC) and multi-tenant architecture for secure user and organization management.
 - Collaborated with product and operations teams to support event platforms and workflow automation systems.

EDUCATION

- **Nehru College of Management, Tamil Nadu** 2023 – 2025
Master of Computer Applications (MCA) CGPA: 7/10
- **Vivekananda College of Arts and Science, Madurai** 2020 – 2023
B.Sc. Computer Science CGPA: 7.05/10

SKILLS

- **Languages:** JavaScript, Python, SQL, PHP
- **Core Computer Science:** OOP Concepts, Data Structures & Algorithms (Basics), RESTful API Design, Authentication & Authorization
- **Frontend:** React.js, HTML, CSS, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, Flask
- **Databases:** MySQL, MongoDB
- **Systems & Architecture:** SaaS Application Development, Multi-Tenant Architecture, Role-Based Access Control (RBAC)
- **Tools & Platforms:** GitHub, VS Code, Vercel, Render, n8n

PROJECTS

- **CRM SaaS** 2025
Customer Relationship Management Software React, Node.js, Express.js, MongoDB
 - Designed and developed a CRM system to manage leads, contacts, and accounts with structured data relationships.
 - Implemented role-based access control (RBAC) to securely manage permissions for different user roles.
 - Built activity timelines and module linking to improve visibility of customer interactions.
- **Event OS** 2025
End-to-End Event & Webinar Management Platform React, Node.js, Express.js, MongoDB
 - Developed a modular event management system handling registrations, attendee data, and workflows.
 - Implemented workspace-based access control with event-specific roles.
 - Built email communication modules for notifications and campaign management.
- **AI Lead Management Agent** 2025
Automated Lead Qualification System n8n, AI Voice Agent, Zoho CRM
 - Built an automated lead qualification system using workflow automation.
 - Designed an AI voice agent to interact with leads and capture interest levels.
 - Integrated the system with Zoho CRM to update lead status and notes automatically.
- **WebSence AI** 2025
AI-Based Website Evaluation Platform React, Flask, Python
 - Developed a multilingual feedback platform using opinion mining and generative AI.
 - Automated website evaluation by analyzing user feedback and generating insights.

- Published the research work in an international journal.

INTERNSHIP EXPERIENCE

- **Full Stack Developer Intern** May 2025 – Jun 2025
Token SaaS Project (Remote) React, Node.js, MongoDB, Tailwind CSS
- Contributed to the development of a SaaS-based clinic token management system.
- Implemented modules for token generation, doctor availability, and real-time queue tracking.
- Built role-based dashboards to support different operational users.

PUBLISHED JOURNALS

- S. Jeyabalaganesh, "WebSence AI – Website Evaluation Using Opinion Mining and Generative AI," *International Journal of Scientific Research in Engineering and Management*, March 2025. [Link]
- S. Jeyabalaganesh, "Lone Wolf – Online Cloth Retail System," *International Journal of Scientific Research in Engineering and Management*, September 2024. [Link]

ACHIEVEMENTS

- Presented and published the research paper "WebSence AI: Enhancing Website Evaluation Using Opinion Mining and Generative AI" at ICEGMICL-2025 and in IJSREM.
- Qualified in the **TCS National Qualifier Test (NQT) 2025** and shortlisted under the **Digital Category**.

CERTIFICATIONS

- IBM – Watson Studio
- NPTEL – Python for Data Science
- Web Designing Fundamentals
- PC Hardware and Troubleshooting
- Programming in ANSI C
